PREFACE

THE publication and completion of this medical directory marks a professional triumph. Medical Men, actuated by a mere desire of filling a long felt want, conceived this publication and carried it through its gestation period, and now, at its birth, offer it to the Medical profession in the same spirit. The road was thorny; obstacles were many and at one time it looked murky. We are glad to say that the resourcefulness and determination of these medical men, and the co-operation of the individual physicians and the secretaries of the respective Medical Societies, enabled us to bring about this publication at this time, and it is their labor that saved the day. Every physician was visited by our agents and when he could not be seen he was either telephoned or written to. This personal canvass in medical directories was heretofore unknown and hence it will make this directory reliable as to data. We have eliminated all historical features and have departed somewhat from the traditional directory; on that we invite both favorable and unfavorable criticisms from the profession. In our next edition we will incorporate new ideas, acting on suggestions sent us by many medical men. We desire to thank the profession at large for their co-operation. We are grateful to the different secretaries for their time and labor given us in furnishing all data, and we are also indebted to the Medical Institutions for their complete and prompt information. We hope that the Medical Directory of Greater Boston will serve a good purpose, and if it fails in that the author will be bitterly disappointed.

Massachusetts Board of Registration and Medical Colleges

MASSACHUSETTS BOARD OF REGISTRATION IN MEDICINE.

Established 1894.

Office, State House, Boston.

C. Edwin Miles, M. D., Chairman, Edwin B. Harvey, M. D., Secretary, Walter P. Bowers, M. D., Samuel H. Calderwood, M. D,. Augustus L. Chase, M. D., Nathaniel R. Perkins, M. D., Augustus C. Walker, M. D.

The regular meetings for the examination of applicants begin on the second Tuesday in March, July and November, at 9.30 A. M., and close on the afternoon of the following day. Special meetings are held in May and September, on corresponding days and hours.

The subjects on which the examinations are principally conducted are anatomy, hygiene, physiology, pathology, surgery, obstetrics, gynecology, diagnosis and practice.

When the general average of the ratings given the several sets of papers of an applicant by the individual examiners is below 70 per cent., his examination is regarded as unsatisfactory. If, however, one's general average is found to be near the minimum requirement, his papers are reviewed by the Board in general session, and his ratings fixed by a consensus of opinion.

The examination questions are intended to be practical, and to cover substantially the instruction given in the medical schools in this country in a four years' course.

HARVARD MEDICAL SCHOOL.

The first degrees in Medicine were conferred in 1788. Before 1811, the degree conferred upon graduates was Bachelor of Medicine; beginning with 1811, the degree has been Doctor of Medicine. The first Medical College was built in 1815.

In the spring of 1906 the Medical School will move from its present quarters on Boylston Street to commodious new buildings on Longwood Avenue, distant about a mile from the present building. At the new site the School possesses twenty-six acres of land. Eleven acres are now occupied by the Medical School buildings; the other fifteen are reserved for hospitals which, it is hoped, will be built on this ground in the near future.

The new buildings are five in number; one is designed for administrative and four for laboratory purposes. The administration building contains the necessary offices, several lecture rooms, and the

Warren Anatomical Museum. The laboratory buildings provide extensive accommodations for various departments.

DIVISION OF STUDIES.

Admission requirements are a degree of Art or Science from a recognized college.

The new Out-Patient Department, on Fruit street, is open from 8.30 to 10 a. m., daily for treatment of the poor only. If a doctor has been employed a letter from him is necessary.

For the last few years there has been a tendency to celebrate "Ether Day" on the 16th of October. This day will, no doubt, become a fixed holiday of the institution.

The Hospital has at its disposal the Dalton Scholarship, amounting to $500 annually. This is devoted to the investigation of the science of medicine.

Candidates are nominated to the Board of Trustees by a Committee with recommendations for the information of the Board. They are either Internes of the General Hospital or male graduates of a

regular American Medical College. The nature of the work in medical investigation proposed to be prosecuted by each candidate is designated.

Further information may be had by applying to the Resident Physician of the Massachusetts General Hospital.

AMERICAN MEDICAL ASSOCIATION.

Organized 1847.)

The object of this association is to promote the science and art of medicine. Contributing to this end, the association endeavors to unite into one compact organization the medical profession of the United States for the purpose of fostering the growth and the diffusion of medical knowledge, of promoting friendly intercourse among American physicians, of safeguarding the material interests of the medical profession, of elevating the standard of medical education, of securing the enactment and enforcement of just medical laws, of enlightening and directing public opinion in regard to the broad problems of hygiene and of representing to the world the practical accomplishments of scientific medicine.

The membership of this Association is open to members of the constituent associations and medical officers of the Army, of the Navy and of the U. S. Public Health and Marine-Hospital Service.

Those State and Territorial Medical Associations which have become organized in accordance with the general plan of organization of the American Medical Association, and which have declared by resolution their allegiance to the said American Medical Association, and which agree with other State and Territorial Medical Associations to the formation and perpetuation of the House of Delegates of the American Medical Association, are recognized as Constituent Associations.

The business body is known as the House of Delegates of the American Medical Association. It consists of delegates elected by the Constituent Associations, by the scientific sections of the American Medical Association from the medical departments of the Army, and of the Navy, and from the United States Public Health and Marine-Hospital Service. It represents the delegated powers of the members of the American Medical Association, and is the national representative body of the Constituent Associations. It elects the general officers of the Association and a board of nine trustees, and transacts all the general business of the Association of a public, professional, scientific or other nature.
